

Eureka-Arcata Route 101 Corridor Improvement

FACT SHEET

The Project

Since May 2002, a Safety Corridor has been in place on Route 101 between Eureka and Arcata as an interim improvement until a more permanent solution could be designed and constructed. In December 2011, a phased plan received approval by the Humboldt County Association of Governments (HCAOG), the project sponsor. The first phase of improvements includes a half-signal at Airport Road and a northbound grade separation at Indianola Road. All other median openings including Mid City Motors, California Redwood, Bracut, and Bayside Cutoff will be closed.

Project Benefit

The safety of the traveling public is of the highest priority and improved safety at intersections, reducing collisions, will be a project benefit.

Project Status

The project is currently under environmental review by the California Coastal Commission for Federal Consistency with the final environmental document expected in the fall/winter of 2012.

Project Costs

The first phase total project cost is approximately \$25 million.

Project Schedule

Begin construction: 2015
